

Ebony Blade
(Author Unknown)

Usually a short sword of dark-metal, this magical blade turns completely black at night. A normal blade in any light equal to a *continual flame* or stronger (full daylight), the Ebony Blade is +2 in any lesser light (i.e. *light*, torch light, dusk, etc.)

In low light levels, the Ebony Blade grants its wielder dark vision out to 90 ft. It can create *darkness, 15' radius* thrice per day at any time. (Note that the Ebony Blade functions at full strength within the darkness.) Finally, it gives a +5 Insight bonus to attempts to Hide in Shadows or Move Silently (non-rogues included).
